

Sprint 1 Report

The Sorters

Actions to stop doing:

Stop scheduling meetings an hour before they happen because some team members are not able to show up on such short notice.

Actions to start doing:

Schedule non-scrum meetings for sprint documentation a couple of days in advance so everyone can show up. Also scheduling some group work meetings to help get work done.

Actions to keep doing:

Keep meeting as a team 5-6pm every other weekday and going to TA meetings on Tuesday 5-6pm and Fridays 6-7pm. So far this has been effective and people have shown up. Keep filling out sprint plans, reviews, and other documentation as a team.

Work Completed\Not Completed:

- User Story 1: Completed: GUI is created and looks good, works well
- User Story 2: Completed: Dataset is represented as bars associated with numerical values
- User Story 3: Not completed: dataset cannot be modified yet
- User Story 4: Not completed: sorting algo has been completed but no animation

Work Completion Rate:

Completed 2 user stories. Sprint started on Tuesday and ended following Monday: lasted for 6 days. Estimated ideal working hours spent on the project: 21 hr

.33 User stories completed per day and 3 working hours per day
