

Sprint 3 Report

The Sorters

Actions to stop doing:

- Working in bursts/pushing at the end of sprint.

Actions to start doing:

- Start continuous deployment and test driven development.
- Implementing extra functionality beyond the MVP.

Actions to keep doing:

- Keep meeting regularly and working on user stories
- Continue to keep teammates updated throughout the development process
- Continue to ask for help on tasks as needed

Work Completed\Not Completed:

The main tasks for this sprint were implemented, but we scrapped a few tasks.

- Completed: A counter for the number of comparisons and swaps, next step button, created a legend explaining what color of the animation does what, highlights pseudocode based on what line of code the animation is going through.
- Not Completed: Timer, 2nd page explaining each sort, this feature was redundant and scrapped.
- Completed: Created a media bar with play/pause/next step features
- Not completed: step back button was difficult to implement and did not add much value so was scrapped.

Work Completion Rate:

- We finished every task we made, besides the ones we decided to scrap.
