Sprint 2 Report

The Sorters

Actions to stop doing:

- Working in bursts/pushing at the end of sprint.

Actions to start doing:

- Start continuous deployment and test driven development.
- Start using coding standards
- Start having more structured stand-up meetings. Everybody says their three things
- Start verifying each other's "needs verification" work early so that people get long as possible to rework their implementations if necessary

Actions to keep doing:

- Keep meeting regularly and working on user stories
- Continue to keep teammates updated throughout the development process
- Continue to ask for help on tasks as needed

Work Completed\Not Completed:

The main tasks for this sprint were implemented, but it still needs some work on fixing minor errors.

- Completed: 4 out of 5 sorts -Continue working on mergesort
- Completed: Created collapsable window for pseudocode
- Not Completed: Created pseudocode for each sort -pseudocode is not correct

Work Completion Rate:

- Most of the user stories for this sprint were completed, but we still need to finish highlighting current lines for pseudo code and polish/fix known errors.
